Building Bright Futures for
Every Child, Every Nation.

About Our Work

Childhood Education International (CE International) is a global consulting service deeply committed to building children's care and education worldwide. With more than **130 years of experience** and a network spanning **100+ countries**, CE International has brought services and resources to thousands of educators and caregivers worldwide.

Capacity Building Solutions

Our Capacity Building services strengthen the systems, leadership, and partnerships that make early childhood programs sustainable and effective. We help partners align policy with implementation, improve coordination across sectors, and create lasting infrastructure that supports every child's wellbeing.

Systems Strengthening

We strengthen early childhood systems to be more resilient and equitable by identifying gaps, aligning policy with practice, and supporting coordinated services across education, health, child protection, and family services.

Leadership Development

Our leadership programs strengthen capacity by providing coaching, training, and mentorship that help educators lead with confidence and care.

Partnership Building

We help secure mutually beneficial partnerships between organizations, institutions, and government ministries by supporting joint planning, clarifying shared values, and guiding partners toward common ground, consensus, and collective action.

Innovative Financing

We support a range of innovative financing approaches and offer guidance, training, and resources that connect business leaders with early childhood partners to fund and scale early learning initiatives sustainably.

CAPACITY BUILDING |

We advance sustainability and resilience in systems that support policy implementation, financing, and management of early childhood services.

100+

Countries Worldwide

CE International partners with organizations and institutions in the early childhood development ecosystem through direct consulting, strategic advising, and resource development, such as:

- ✓ Strategic and operational planning
- ✓ Leadership pipeline and training program design
- ✓ Partnership facilitation and coalition development
- ✓ Sustainable financing models and monitoring systems

Our Impact in Action

Projects such as Building Business Champions for Children in Brazil and the Community of Practice Framework in Serbia have strengthened leadership pipelines, improved cross-sector coordination, and advanced system resilience for young children globally.

Building Business Champions for Children in Brazil

Through the Building Brazil Business Champions for Children project, Childhood Education International's Center for Business Champions (CBC) supported Fundação Abrinq pelos Direitos da Criança (FADC) in establishing a network of business champions for childhood development in Brazil. The program culminated with the FADC formally launching its business network for children, *Campeões pela Infância* ("Champions for Children").
